Additional Resources

For a complete patient packet or to schedule an appointment, call one of our offices listed above. We also maintain an extensive web site at **www.cnyfertility.com**, where you will find in-depth explanations of infertility factors, comprehensive descriptions of our services, and the latest news and information from our office. We also maintain **www.cnyhealingarts.com** – a referral service dedicated to exploring complimentary mind/body approaches to fertility treatments.

Donor Program

Egg Donation, Embryo Donation
and Easy to View Donor Profiles

Syracuse • Albany • Rochester

www.cnyfertility.com

Donor Program:

For couples and individuals who experience a lack of eggs or sperm, or whose eggs or sperm will not allow development into viable embryos, using donated eggs or sperm (or both in some cases) is a course of treatment worth consideration, as well as donated embryos. Donors are usually anonymous, though not necessarily so – as in cases using family members or significant others.

Donor Profiles:

Our website helps keep our donor database updated for our intended parents, as well as provide them with the most recent information on our donors. You will be able to anonymously review the current donor profiles that are available through CNY Fertility Center.

Donor Payment Options:

Our goal at CNY Fertility Center is to provide affordable, compassionate, quality care to our patients. We participate with and accept most insurance plans. We also offer a per cycle payment plan and a multi cycle money back guarantee program, these help to make the costs of Donor Treatments more affordable.

Donor Cycles start at \$6200

Our Per Cycle Donor Plan is an interest free option to help our patients pay for treatments over a period of one year.

Insurance Plans and benefits will vary with each patient and insurance carrier. Prior to your initial consultation, our office will contact your insurance company to verify infertility benefits and medication coverage.

Our Donor Egg Refund Plan

was created for non-insured IVF patients who meet the eligibility requirements. For one single up-front payment of \$45,000 you are eligible for up to 4 fresh IVF Donor Cycles and unlimited frozen cycles over a 2 year period.

Embryo Donation is now another option available to our clients seeking to either create, or expand their families.
