## CNY Fertility Center Consult Blood Work

Welcome to CNY Fertility Center. We look forward to assisting you on your journey to pregnancy.

As part of the testing that we recommend for infertility and/or recurrent pregnancy loss, you will be offered multiple blood tests that Dr. Kiltz feels are important to help us guide infectious disease screening, hormone testing, genetic testing and autoimmune / coagulopathy testing. **The blood work is not part of the consultation cost as we send this blood to an outside laboratory.** Please see the form below regarding this.

For those clients with no insurance:

The blood work is not included in your consult costs and you will be financially responsible for any blood drawn. A list of approximate costs are listed on the financial agreement.

For those clients with insurance:

Your insurance may cover anywhere from all to none of your blood work costs. Whatever is not covered by your insurance will be billed to you by the laboratory and is your responsibility to pay. If you would like more information about what is/is not covered by your insurance, you may opt to not have your blood drawn until you feel more comfortable about the potential out of pocket costs to you.

It would be our pleasure to answer any additional questions about this matter. Syracuse and Rochester clients please call 1-800-539-9870, ext 3058 or 3040 Albany clients please call 866-375-4589, ext 5703

Sincerely,  
CNY Fertility Staff
