

Discover the revitalizing power of light.

Join renowned guest speaker, Wes Burwell, as he explains the science and history of light energy and how In Light Wellness Systems, the most advanced product line available, can benefit your health and vitality!

LED light energy application is a process by which energy is delivered to various parts of the body via light emitting diodes and is absorbed by the cells. The various energy wavelengths penetrate the skin to different depths and provide the energy cells need to activate increased circulation and stimulate cells to release Nitric Oxide.

Date

NASA's studies have shown that cells which have been exposed to LED light energy applications have a 150% enhancement to their cellular metabolism, thereby accelerating repair and replenishment.

Time

The sessions are non-abrasive, non-invasive, painless, and result in absolutely no downtime. It is safe for all ages and skin types professionally or at home!

Location

Light energy can support:

- ▶ Increased circulation
- ▶ Pain relief
- ▶ Increased comfort
- ▶ Skin rejuvenation
